- Current Stage: Vertical Slice in Production
- Target Release: Q3 2027 (Early Access)

About the Game

Growth makes survival more dangerous

How It Plays

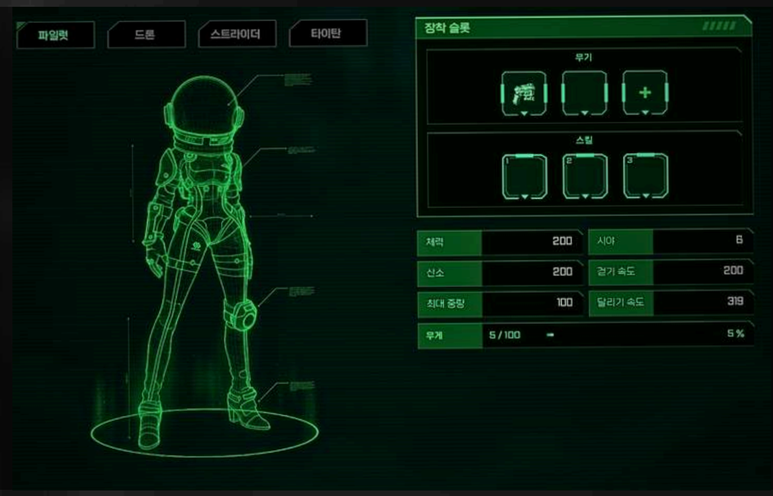

- Exploring, mining, building, combat: every action makes noise
- The louder it gets, the bigger the infected waves
- Players balance fast growth and safe survival at every step
- Class / terrain / resources / boss reset every run

Key Features

Waves that fill the screen, drawn by your noise

Overwhelming Scale

- 100,000 simultaneous spawns
- Waves that react to player decisions
- Stable frame rate on mid-range PCs

Noise System

- Every action makes noise
- Noise scanner shows range and intensity
- Threats escalate as enemies gather

Three Builds

- Character: low noise, strong vs. bosses
- Mech: mobility, heavy firepower
- Turret: strong vs. large waves

Roguelike Elements

Every run, a new survival strategy

A New Solution Every Run

- Class / terrain / resources reset every run
- Random bosses change your tactics
- No fixed builds: new priorities every run

Core Survival Loop

ACTIONS AND THREATS, DIRECTLY LINKED

Grow / Repeat
Roguelike-based tactics

Explore / Gather
Secure resources

Power / Build
Build defenses

Noise Rises
Detection rises with every action

Enemy Swarm
Massive infected assault

Direct Combat
Defend the base, strike directly

Gameplay Trailer

For Creators

First playable build in November: be the first to play.

Streaming Highlights

- The louder it gets, the more waves fill the screen
- New class, terrain and boss every run, new tactics
- Grow big or stay quiet: choose at every step
- Work in progress, improving with player feedback
